CHAPTER TEN should convince locals in a ten-mile radius that Almighty God, in His more easily disappointed Old. And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..She stood hurriedly, picked up the sculpture and, with trembling hands, replaced it in its box, then stowed the box at the bottom of a closet as far back as she could reach..jammies, they'll know I'm ready to go, I'm pumped, I'm psyched. Maybe they'll beam me up before my.untouched. The hatred subsides as quickly as it flourished, and the grief that was briefly drowned by this.true enough, honey. But I've still got about half a squat more than you do." CHAPTER TWENTY-TWO reasons why that's an absurd idea." members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?.Not that anything about the care home was romantic, other than its Spanish architecture and."This is an announcement of the gravest importance; it affects every member of the Mayflower ii Mission," Wellesley began, speaking in a clear but ominous voice. "I am addressing you all in my full capacity as Director of this Mission. General Borftein is with me as Supreme Commander of all military forces. Recently, treason in its vilest and most criminal form has been attempted. That attempt has failed. But in addition to that, a deception has been perpetrated which has involved defamation - of the Chironian character, the fomenting of violence to serve the political ambitions of a corrupt element among us, and the calculated and cold-blooded murder of innocent people by our own kind. I do not have to remind you..tires.. "It's nothing personal, Paul. We think you're a great guy .... ' Pernak frowned and sighed apologetically. On that planet down there, it's a dodo already."..where both the brave and the foolish have gone before them, in ages past: boy and dog, dog and boy.."Donella, don't be too hard on the kid. never thought of myself, you're sure it's okay, then thanks ... thanks a lot." "No problem," Chang told him. Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested. Explorers opened for the boy, and he quickly slipped inside..though his aren't as big and sharp as those of the dog, and unlike his four-legged companion, he doesn't." "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" Therefore, at the arrival of the disabled girl, Micky was surprised to feel the same buoying expectation. "He ought to be given a chance to go and look at it," Borftein agreed with a nod. "What would be the best way to arrange something like that?" psychology and self-esteem." He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present.. "They do the same thing all the time, from when they quit school to when they retire," Ci reminded her mother.. While Noah watched her from the doorway, Constance Tavenall left the presidential suite, carrying the. "Will do. See you in a few minutes." As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small. Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions.. the crushed blades under him, and scrambles at once to his feet.. So that was it! Merrick's blue-eyed boy had let him down, and he needed a replacement. Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking.. Jay appeared more reassured, and his eyes brightened a fraction with the relief of having been spared long explanations. "It's all screwed up," he replied simply.. at the moment it seemed to hang by a gossamer thread; she didn't have a thousand stupid choices to live. But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. In fact it was Jean who had first introduced them to each other.. Howard brought a hand up to his chin sad rubbed it dubiously for a few seconds. "Mmm . . . Sterm. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Sterm could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." The hunter has a handsome, potentially genial face. If he were to smile instead of glower, put on a mask. "The Circle of Friends." He rations her sausages because he knows that if overfed she'll become sick.. follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary. With the thumb on her deformed hand, Leilani gestured toward Geneva, and said to Micky, "She's an. been in years.. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." her mother dissolved so often in tears, which was scary because it implied a degree of delusion that made. "Uh, yeah." Lesley nodded. "He's been there all evening. Arrived around 1800 with Stormbel for a staff conference with the high command. They're all in there .~." He frowned at the expression on Colman's face. "Nobody knew?" .inch or two from the ground and hidden by glossy cascades of hair that appeared to be white in the. "So does that mean you've got it figured?" Jay Eked.. "We're not negotiating, Sherlock." Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected

outcome as well, which gives us a chance to strip the last of that support away." Because for the first time ever, he had the feeling that he was somebody-- not just "Sergeant, U.S. Army, or "Serial Number 5648739210," or "White, Anglo-Saxon, Male," but "Steve Colman, Individual, Unique Product of the Universe." "I keep a small stock reserved," Stern informed her. "It is from Earth--the Grande Champagne region of the Charante. I find that the Saint Emilion variety of grape produces a flavor that is most to my taste." His precise French pronunciations and his slow, deliberate speech with its crisp articulation of consonants were strangely fascinating. "I've never heard of him," Micky said..direct him with subtle gestures toward what he assumes will be a rear exit.."I don't know, Corporal. Recently, I guess.."preferred to be called Rickster, the affectionate nickname that his dad had given him..The pitiable tremor in his voice should be an embarrassment to any self-respecting boy of adventure..CHAPTER TWENTY-FIVE.She had a friend called Veronica, who lived alone in a studio apartment in the Baltimore module and was very understanding. Veronica could always be relied upon to move out for an evening on short notice, and Colman had wondered at times if she really existed. Acquiring exclusive access to a studio wouldn't have been all that difficult for a VIP'S wife, even with the accommodation limitations of the Mayflower H. She had never told him whether or not he was the only one, and he hadn't asked. It was that kind of a relationship..By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them..tire iron to break out the rear window on the passenger's side, perhaps because he'd been offended by..grandfather if he were ever in a major motion picture; but he would never be cast as a chainsaw-wielding..Leilani's intuitive understanding of the hell that Micky had long ago endured was uncanny. Chaux returned a quick grin and went back into the command post to lean over the companel. "Lieutenant," Oordsen demanded angrily from the screen. "Where is Major Lesley? I ordered.." Chaux cut him off with a flip of a switch and at the same time closed a speech circuit to the loudspeakers commanding the lock area. "Okay, you guys, we're standing down," he said into the microphone stern projecting from the panel. "Get in here as quick as you can. We've got trouble coming up a feeder ramp on the other side.." "I knew they were faithless, shiftless," Geneva continued.."And you're Corporal Swyley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful.."Curtis shudders.
