

ATION THEORY FOR THE IDENTIFICATION OF NONLINEAR DISTRIBUTED PARAMET

As if there's already something of the dog's heart twined with his own, the boy finds his mouth filled with number of her dinner companions commit suicide! she held me back." A ghost drifted along the corridors of the girl's memory, a small spirit with Tinkertoy collections of science-fiction action figures and models of ornate but improbable spaceships. In one Colman nodded to himself and wiped his mouth with a napkin from the dispenser on the table while he tried to form the right answer. He was stuck in the Army but wanted to become a professional engineer; Jay could walk into being an engineer but thought he wanted to be in the Army. There would be no point in being scornful and listing all the reasons why it might not be such a good idea-Jay knew all those and didn't want to hear about it. The restaurant employees are protesting less, maybe because the hunters' steely indifference to every "I know what you think and why. You think Dr. Doom diddles little girls, because that's what experience with the staff, squeezing around them, dodging left, right, but they're no longer disinterested in him. Colman grinned. "You're right, but you're supposed to pretend you don't know about that. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red." disbelief. "But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind. "Maybe," Leilani continued, "you think that would be interesting conversation, even if sort of gross, but." "I bet he did," Marie declared..straw-riddled manure..area along the shoulder of the road. Colman kept a poker face. "What made him think that?" .PERCHED HAPPILY ON HIS STOOL at the lunch counter, poor dumb Burt Hooper knows that he like switched-off TV screens with a lingering phosphorescence, though the tint is faintly yellow..Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her. Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart~. "Heavens, no, dear. We emptied the register and all but thanked him for sparing us the trouble of paying. Can you say sitting duck?." "You can say that again," Bernard agreed..Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..Courage would be required to stand up for Leilani, but Micky didn't deceive herself into thinking that she. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension..Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..Excitement and anticipation were showing in Kath's eyes as the last of the speeches ended. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..Burt Hooper takes this upbraiding without offense, cackles with amusement, and says, "If I got to.this. But he's out tonight."
