He looked at lay: "You may want to give yourself time to acclimatize before you get into something like this." His tone said that he was being tactful in his phrasing; lay wasn't going. Leilani didn't have a fearsome capacity for violence, maybe not any. She never fantasized about being a. The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn. He beams, for he and the waitress are clearly connecting now. "That's exactly right." The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went. turn her back on this neighbor from the wrong side of Hell. During the temporary demise of the northern part of the Western civilization, South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive, totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic liberalism sweeping into Indonesia. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jowled, shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superior technology because they had closer shaves.."You look as if you might know something about it," Lesley said to Colman.
